**State Report | November 2015**

**REMINDER / License Bond Program** The PHCC Bond Programs allows members to purchase plumbing, HVAC, sewer and water bonds at a discounted cost for all municipalities in which they work.

The program is underwritten by Federated Insurance with the guidance and support of PHCC. The association works very closely with Federated and municipalities throughout Ohio to insure that the bond program covers member needs.

**Remind your customers to prepare for the winter now!** Fall is here, and winter is coming. Remind your customers that a little preparation and preventative maintenance now will help keep them cozy and safe through next season...and avoid potential hassles once the thermostat *really* drops!

**Click here** for a sample Facebook post and tweet that you can easily adapt for your company page and tweet out to your customers.

**SAVE THE DATE**

**PHCC Benefit of the Month / Education and Training**

PHCC members who upgrade their work skills and knowledge not only keep up with the latest technologies and business techniques, but receive other benefits, such as boosting their professional image, increasing their level of expertise, increasing profits and putting themselves at the cutting-edge of the PHC industry.

PHCC, at the local, state and national levels, is the leading provider of technical and business education and training for PHC contractors, managers, and other personnel.

**“30 in 15” PHCC Membership Drive!**

The year-long campaign will grow PHCC membership across the state as chapters and their members reach out to prospective members in their area.

Thank you in advance for taking part in the future growth of PHCC!

**DOE Continues A/C and Furnace Efficiency Review; PHCC Provides Input at Meetings** PHCC attended meetings following the U.S. Dept. of Energy's (DOE) proposal to increase efficiency standards for residential Central Air Conditioners and Gas Furnaces. DOE is working with a group of industry stakeholders to determine the economic benefit and technical feasibility of increasing central air conditioner efficiencies, a proposal with complex statistical modeling. Industry stakeholders are working to understand the ramifications of these modeled projections so an equitable recommendation can be made. The residential furnace group is meeting to review similar modeling in hopes of reaching a compromise position that would not eliminate the 80% efficient class of gas furnace. Both meetings are upbeat, and it is hoped that an agreement will be reached before the end of the year.

**May you and your family have a joyous Thanksgiving celebration!**  
*Association offices will be closed Thursday Nov 26 & Friday Nov 27*
